## DETAILED ACTION

### *Continued Prosecution Application*

The Request for Continued Examination (RCE) under 37 CFR 1.114 based on parent Application No. 09/447504 is acceptable and a RCE has been established. An action on the RCE follows.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10, 12, 23, 24, 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Tano (US 4597719).

Tano discloses a process for controlling spitting from a multistage pump having feed (17) and dispensation (19) chambers an outlet valve (35) coupled to the dispensation chamber, the process comprising a first stage, wherein while a first valve is closed and a second valve closed, the pump chamber is brought to equilibrium, a second stage wherein a pump is activated to pump a fluid onto an object when the second valve is opened.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3742

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 22, 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tano.

Tano discloses the claimed invention except the specific viscosity of the fluid to be pumped, it would be within the skill of the routineer to use such a process as described by Tano for a fluid having the viscosity as claimed by applicant.

*Allowable Subject Matter*

Claims 14-21, 25-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
